REPLACEMENT FILTER DISCS

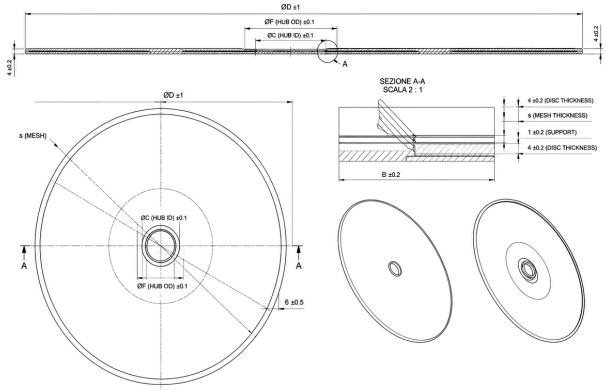

For diatomaceous earth filters

High-precision filter discs and sectors, compatible with the leading Italian filtration system brands. Manufactured from food-grade AISI 304 / AISI 316L stainless steel, they ensure optimal filtration performance, high resistance, and a long service life.

Precision, Compatibility and Maximum Durability

CUSTOM MANUFACTURING

In addition to standard models, we manufacture filter discs and sectors according to customer drawings or samples, adapting them to the specific requirements of each installation.

FILTRATION SOLUTIONS BUILT TO LAST

KEY STRENGTHS

HIGH FILTRATION PRECISION

Uniform AISI 316L mesh for optimal diatomaceous earth retention and maximum product clarity.

GUARANTEED COMPATIBILITY

Precision manufacturing according to standard central hub dimensions and diameters used in the Italian market (Ø 400, 500, 600 up to 1400 mm).

ROBUST CONSTRUCTION

Durable welding resistant to high-pressure washing, thermal shocks, and chemical regeneration.

MANUAL AND AUTOMATIC DISCHARGE

Available for discharge systems using vibration, rotation, or manual extraction.
