VLS Technologies

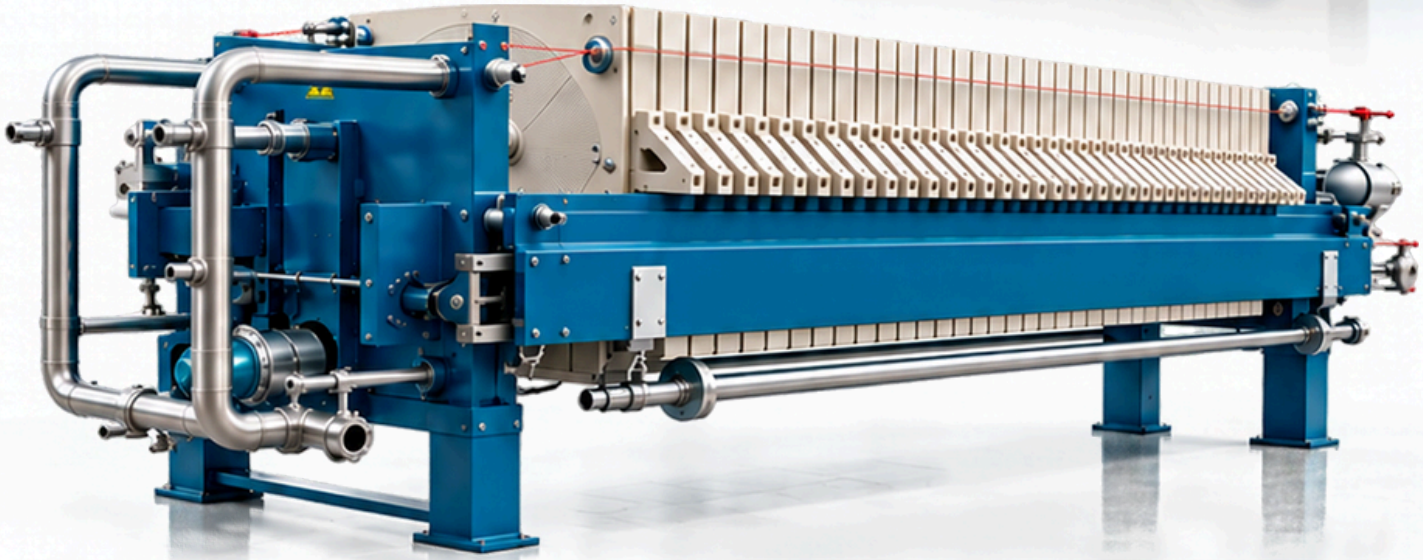

SOLID-LIQUID SEPARATION SOLUTIONS

Filter press concamerated plates

Filter press concamerated plates

ENGINEERED FOR PERFORMANCE. BUILT FOR RELIABILITY.

Designed for efficient solid-liquid separation, LFA VLS filter press plates combine mechanical strength, chemical resistance and optimized filtration performance for demanding industrial applications.

VLS Technologies

KEY FEATURES

VERSATILE SIZING

Standard dimensions from 400 400 mm to 1500 2000 mm, with customized geometries and thicknesses available.

PREMIUM MATERIALS

High-quality polypropylene (PP) for excellent chemical resistance, mechanical strength and long-term durability.

HIGH-TEMPERATURE RESISTANCE

Specialized materials designed for elevated operating temperatures.

OPTIMIZED FILTRATION

Advanced drainage channels for efficient liquid discharge, effective cake formation and easy cake release.
