Premium replacement membranes

For Pneumatic Grapes Presses

PREMIUM REPLACEMENT MEMBRANES FOR PNEUMATIC GRAPE PRESSES

Food-Grade PVC & Polyurethane (PU) | Compatible with Leading European Brands

Designed for gentle pressing and maximum extraction efficiency, our membranes are manufactured from high-strength food-grade fabrics coated with premium PVC or polyurethane.

Key Features

Certified food-grade materials

High-frequency welded seams

Excellent resistance to tearing, abrasion and repeated pressure cycles

Smooth, non-stick surface for easy cleaning

Reliable performance at operating pressures up to 2.0 bar

Custom-made according to drawings or samples

VLS Technologies

Material Options

PVC: durable, cost-effective and resistant to standard winery cleaning agents.
Polyurethane (PU): lighter and more flexible, with superior resistance to abrasion, fatigue and low temperatures.
Available for lateral, half-moon, central and tubular pneumatic presses, with solutions compatible with all major European manufacturers.
